

Secure Global Desktop[™] TERMINAL SERVICES EDITION

*The ultimate companion to
Windows[®] Terminal Services*

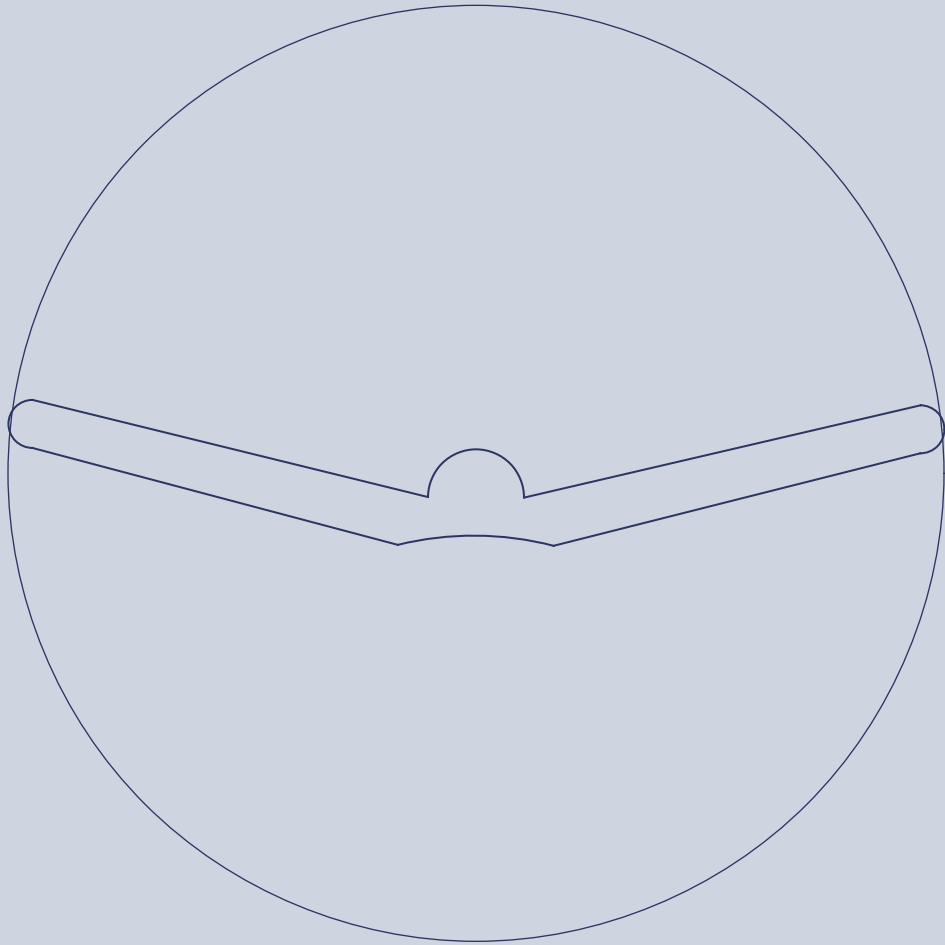

Secure Global Desktop[™] TERMINAL SERVICES EDITION IS
the ultimate companion to Windows[®] Terminal Services.

It is an indispensable solution that provides a powerful set of application management and secure access capabilities for Windows[®] Server 2003 and Windows[®] 2000 Server environments, which include:

- Publishing of Windows applications and the Windows desktop
- Resource-based, application-level load balancing
- SSL encryption and tunneling of all sensitive information
- Easy firewall traversal and support for secure DMZ environments
- Location-based security policies and application launch settings
- Print traffic compression and throttling
- Delegated administration
- Application usage metering and reporting
- Many other advanced application management services

Secure Global Desktop Terminal Services Edition software enhances the end user's application experience with the following client-side features:

- Application access via desktop shortcuts, Windows Start Menu or browser-based via Application Launch Pad
- Presentation of applications in seamless windows
- Intelligent file association
- Local and network file saving
- Local, server and network printing

MINIMUM SYSTEM REQUIREMENTS

Microsoft Windows Server 2003 and hardware required for Windows Server 2003 products
Microsoft Windows 2000 Server and hardware required for Windows 2000 Server products

TARANTELLA, INC. is a leading provider of secure application access software. Tarantella's Secure Global Desktop family of products enables organizations to access and manage information, data and applications across virtually all platforms, networks and devices. Secure Global Desktop allows enterprise customers to web-enable any enterprise application without costly rewrites, bridging the gap between vendors and ensuring that customers have complete access to business-critical information. Using Tarantella's software, customers realize the benefits of secure corporate data, maximizing return on existing IT assets and improved productivity. The company markets its products through the Internet, key industry partners and a worldwide distribution network.

Tarantella is headquartered in Santa Cruz, California.
